Languages & Technologies

- MERN Stack (MongoDB, Express.js, React.js, Node.js)
- HTML, CSS, JavaScript, Mongoose, Postman, Git, Github, Bootstrap, Axios, JSON web token

Projects

Capstone - SK8 STATUS   GitHub Repo

A social skating application allowing you to connect with fellow skateboarders. Sharing the skatepark friends are currently skating at and for how long.

- Technologies used: JavaScript, React.js, Express.js, Node.js, MongoDB, HTML, CSS, Mongoose, Postman, Git, Google Maps API, Axios, JSON Web Token, Bootstrap
- Application features:
    - User account registration, login, and logout (Authentication & JWT)
    - Edit user profile including Name, About Me, and Stance
    - Individual skatepark pages, displaying skatepark info and reviews section allowing to write and view reviews
    - Integrated react-google-maps/api to display maps of skatepark location
    - Friends page allowing to accept/deny/send/cancel friend requests
    - Set a "Skate Status" so friends can see which skatepark your skating at and for how long

Personal Portfolio   Website   GitHub Repo

A person portfolio website displaying projects as well as a contact me section

- Technologies used: JavaScript, HTML, CSS, React.js, Node.js, Git, Netlify
- Application features:
    - Responsive design for both mobile and desktop
    - Projects page displaying personal projects with Github Repos
    - Contact me section allowing user to send a message to personal email

Conway's Game of Life   Website   GitHub Repo

React application of the zero player game Conway's Game of Life

- Technologies used: JavaScript, HTML, CSS, Git, React.js, Node.js, Netlify
